This new book explores a range of issues related to the human impact of tissue and cell donation programmes around the world. It addresses the areas that are of key concern and have profound implications for the donors, recipients and healthcare professionals involved.

**Focusing on tissue and haematopoietic stem cells this book is essential for all those working in the field of human transplant donation.**

- Policies and practices reviewed using specific donor case histories as examples
- Multidisciplinary team of editors and contributors, with expertise in tissue and cell banking and transplantation, haematology, transfusion medicine, microbiology, and medical ethics
- Provides a guide to easier and safer practice in referrals, tissue and organ procurement, cord blood collection and decision making.
